Cal OES Daily Situation Report

This day in California History (1869): Southern California's first railroad, the Los Angeles & San Pedro, opened connecting the city of Los Angeles with the emergent shipping harbor on San Pedro Bay. The steam locomotive San Gabriel was the first to haul freight and passengers between the two cities on the newly established line.

Cal EOC Incident - 2014 Drought

• SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

• Freeze Watch in effect from this evening through Tuesday morning for areas in Siskiyou County

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Drier and slightly warmer conditions are expected today as high pressure briefly builds back over the area. Another storm system will approach the area on Tuesday and Wednesday bringing increasing rain chances.

Medford Weather:

A short wave rotating through the upper level trough will move through northern Oregon later tonight, and then a sharp long wave will build in from the west. Post-frontal showers will end later this morning and the remainder of today and Tuesday will be dry. Inland high temperatures will rebound back up to 5 to 10 degrees above normal today and the Tuesday highs will be similar. The surface warm front will arrive Tuesday night followed by a cold front early Wednesday morning. This system will be significantly wetter than the Sunday system. High temperatures Wednesday will cool to around normal values across the forecast area. Post-frontal showers will continue through Wednesday night.

Reno Weather:

Warm and dry conditions today will give way to increasing clouds for tomorrow as low pressure nears the California coast. Showers are forecast for Wednesday and Thursday as the low passes through the region. Dry and warm conditions should return for the weekend.

San Francisco Weather:

Mostly sunny and seasonably warm conditions forecast today with high pressure over the region. No big changes for Tuesday except some late day increase in clouds which may cool temperatures a few degrees. There will be a chance of light rain by around sunrise Wednesday from the Bay Area northward. That system will quickly move east with dry conditions returning Wednesday night into Thursday morning. High pressure rebuilds Thursday through Halloween with dry conditions and periods of breezy north winds in the hills.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

High pressure builds over the area through Tuesday with dry and mild weather. A weather system may bring some light rain to the region Tuesday night into Thursday.

Hanford Weather:

Dry weather and above normal afternoon temperatures can be expected over the district through Tuesday while a ridge of high pressure builds over the state. A storm system over the eastern Pacific will bring cooler temperatures and a chance of showers by midweek.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High pressure aloft will keep the weather rather warm across the region through Tuesday. Low pressure aloft will bring a slight chance of showers and cooler weather Wednesday into Thursday. Upper level ridging will bring warmer weather Friday through Sunday with gusty Santa Ana winds possible at times in some areas.

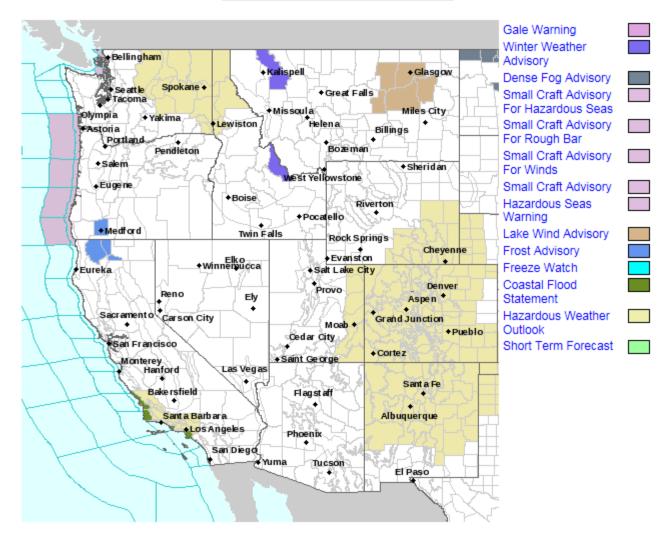

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties: Slightly warmer conditions today under weak high pressure with patchy early morning low clouds and fog near the coast. For Tuesday through Thursday, a trough of low pressure will move southward along the West Coast into the southwest states bringing a cooling trend and deeper marine layer with gusty west winds in the mountains and deserts. A period of moderate offshore flow is expected for Friday into early Saturday as that low pressure system moves eastward bringing gusty north to northeast winds below the Cajon Pass and near the Santa Ana Mountains and Foothills. There will be a warming trend beginning Friday and continuing into Sunday for the far inland areas. For early next week, a trough of low pressure moving southward near the West Coast will bring cooling and a chance of precipitation.

Southeast California Weather:

Dry weather with above normal temperatures will continue across the region through Wednesday. This will be followed by breezy and much cooler weather Thursday and Friday as a cold front moves through the region. There is a chance of showers late Thursday and Friday. Clearing skies are forecast Saturday with a return to near normal weather Sunday and Monday.

CAL OES 2014 DROUGHT

Cal EOC Incident - 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every other Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident - 2014 Drought
